

GENERAL ASSEMBLY OF NORTH CAROLINA  
SESSION 2007

S

D

SENATE DRS15242-SBz-42A\* (05/14)

Short Title: Drought/Water Management Recommendations. (Public)

---

Sponsors: Senators Clodfelter, and Albertson.

---

Referred to:

---

1 A BILL TO BE ENTITLED  
2 AN ACT TO IMPLEMENT WATER MANAGEMENT AND DROUGHT  
3 PREPAREDNESS AND RESPONSE MEASURES, AS RECOMMENDED BY  
4 THE ENVIRONMENTAL REVIEW COMMISSION.

5 The General Assembly of North Carolina enacts:

6 **SECTION 1.** G.S. 143-215.22H reads as rewritten:

7 **"§ 143-215.22H. Registration of water withdrawals and transfers required.**

8 (a) Any person who withdraws 100,000 gallons per day or more of water from  
9 the surface or groundwaters of the State or who transfers 100,000 gallons per day or  
10 more of water from one river basin to another shall register the withdrawal or transfer  
11 with the Commission. A person registering a water withdrawal or transfer shall provide  
12 the Commission with the following information:

13 (1) The maximum daily amount of the water withdrawal or transfer  
14 expressed in thousands of gallons per day.

15 (1a) The monthly average withdrawal or transfer expressed in thousands of  
16 gallons per day.

17 (2) The location of the points of withdrawal and discharge and the  
18 capacity of each facility used to make the withdrawal or transfer.

19 (3) The monthly average discharge expressed in thousands of gallons per  
20 day.

21 (b) Any person initiating a new water withdrawal or transfer of 100,000 gallons  
22 per day or more shall register the withdrawal or transfer with the Commission not later  
23 than ~~six~~two months after the initiation of the withdrawal or transfer. The information  
24 required under subsection (a) of this section shall be submitted with respect to the new  
25 withdrawal or transfer.

26 ~~(b1) Subsections (a) and (b) of this section shall not apply to a person who~~  
27 ~~withdraws or transfers less than 1,000,000 gallons per day of water for activities directly~~

1 related or incidental to the production of crops, fruits, vegetables, ornamental and  
2 flowering plants, dairy products, livestock, poultry, and other agricultural products.

3 (c) A unit of local government that has completed a local water supply plan that  
4 meets the requirements of G.S. 143-355(l) and that has periodically revised and updated  
5 its plan as required by the Department has satisfied the requirements of this section and  
6 is not required to separately register a water withdrawal or transfer or to update a  
7 registration under this section.

8 (d) Any person who is required to register a water withdrawal or transfer under  
9 this section shall update the registration by providing the Commission with a current  
10 version of the information required by subsection (a) of this section at five-year  
11 intervals following the initial registration. A person who submits information to update  
12 a registration of a water withdrawal or transfer is not required to pay an additional  
13 registration fee under G.S. 143-215.3(a)(1a) and G.S. 143-215.3(a)(1b), but is subject to  
14 the late registration fee established under this section in the event that updated  
15 information is not submitted as required by this subsection.

16 (e) Any person who is required to register a water transfer or withdrawal under  
17 this section and fails to do so shall pay, in addition to the registration fee required under  
18 G.S. 143-215.3(a)(1a) and G.S. 143-215.3(a)(1b), a late registration fee of ~~five dollars~~  
19 ~~(\$5.00) per day for each day the registration is late up to a maximum of five hundred~~  
20 ~~dollars (\$500.00).~~ one hundred dollars (\$100.00). A person who is required to update  
21 a registration under this section and fails to do so shall pay a fee of ~~five dollars (\$5.00)~~  
22 ~~per day for each day the updated information is late up to a maximum of five hundred~~  
23 ~~dollars (\$500.00).~~ fifty dollars (\$50.00). A late registration fee shall not be charged to a  
24 farmer who submits a registration that pertains to farming operations. For each willful  
25 action or failure to act for which a penalty may be assessed under this subsection, the  
26 Commission may consider each day the action or inaction continues after notice is given  
27 of the violation as a separate violation. A separate penalty may be assessed for each  
28 separate violation."

29 **SECTION 2.** G.S. 143-350 reads as rewritten:

30 **"§ 143-350. Definitions.**

31 As used in this Article:

- 32 (1) "Commission" means the Environmental Management Commission.  
33 (2) "Department" means the Department of Environment and Natural  
34 Resources.  
35 (3) "Essential water use" means the use of water necessary for firefighting,  
36 health, and safety; water needed to sustain human and animal life; and  
37 water necessary to satisfy federal, State, and local laws for the  
38 protection of public health, safety, the environment, and natural  
39 resources.  
40 (4) "Large community water system" means a community water system,  
41 as defined in G.S. 130A-313(10), that regularly serves 1,000 or more  
42 service connections or 3,000 or more individuals.

- 1           (5) "Unit of local government" means a county, city, consolidated  
2           city-county, sanitary district, or other local political subdivision or  
3           authority or agency or local government."

4           **SECTION 3.** G.S. 143-354 reads as rewritten:

5   **"§ 143-354. Ordinary powers and duties of the Commission.**

6   (a) Powers and Duties in General. – Except as otherwise specified in this Article,  
7 the powers and duties of the Commission shall be as follows:

- 8           (1) The Commission shall carry out a program of planning and education  
9           concerning the most beneficial long-range conservation and use of the  
10           water resources of the State. It shall investigate the long-range needs  
11           of counties and municipalities and other local governments for water  
12           supply storage available in federal projects.
- 13           (2) The Commission shall advise the Governor as to how the State's  
14           present water research activities might be coordinated.
- 15           ~~(3) The Commission, based on information available, shall notify any~~  
16           ~~municipality or other governmental unit of potential water shortages or~~  
17           ~~emergencies foreseen by the Commission affecting the water supply of~~  
18           ~~such municipality or unit together with the Commission's~~  
19           ~~recommendations for restricting and conserving the use of water or~~  
20           ~~increasing the water supply by or in such municipality or unit. Failure~~  
21           ~~reasonably to follow such recommendations shall make such~~  
22           ~~municipality or other governmental unit ineligible to receive any~~  
23           ~~emergency diversion of waters as hereinafter provided.~~
- 24           (4) The Commission is authorized to call upon the Attorney General for  
25           such legal advice as is necessary to the functioning of the Commission.
- 26           (5) Recognizing the complexity and difficulties attendant upon the  
27           recommendation of the General Assembly of fair and beneficial  
28           legislation affecting the use and conservation of water, the  
29           Commission shall solicit from the various water interests of the State  
30           their suggestions thereon.
- 31           (6) The Commission may hold public hearings for the purpose of  
32           obtaining evidence and information and permitting discussion relative  
33           to water resources legislation and shall have the power to subpoena  
34           witnesses therefor.
- 35           (7) All recommendations for proposed legislation made by the  
36           Commission shall be available to the public.
- 37           (8) The Commission shall adopt such rules and regulations as may be  
38           necessary to carry out the purposes of this Article.
- 39           (9) Any member of the Commission or any person authorized by it, shall  
40           have the right to enter upon any private or public lands or waters for  
41           the purpose of making investigations and studies reasonably necessary  
42           in the gathering of facts concerning streams and watersheds, subject to  
43           responsibility for any damage done to property entered.

1 (10) The Commission is authorized to provide to federal agencies the  
2 required assurances, subject to availability of appropriations by the  
3 General Assembly or applicable funds or assurances from local  
4 governments, of nonfederal cooperation for water supply storage and  
5 other congressionally authorized purposes in federal projects.

6 (11) The Commission is authorized to assign or transfer to any county or  
7 municipality or other local government having a need for water supply  
8 storage in federal projects any interest held by the State in such  
9 storage, upon the assumption of repayment obligation therefor, or  
10 compensation to the State, by such local government. The Commission  
11 shall also have the authority to reassign or transfer interests in such  
12 storage held by local governments, if indicated by the investigation of  
13 needs made pursuant to subsection (a)(1) of this section, subject to  
14 equitable adjustment of financial responsibility.

15 ~~(b) Declaration of Water Emergency.— Upon the request of the governing body~~  
16 ~~of a county, city or town the Commission shall conduct an investigation to determine~~  
17 ~~whether the needs of human consumption, necessary sanitation and public safety require~~  
18 ~~emergency action as hereinafter provided. Upon making such determination, the~~  
19 ~~Commission shall conduct a public hearing on the question of the source of relief water~~  
20 ~~after three days' written notice of such hearing has been given to any persons having the~~  
21 ~~right to the immediate use of water at the point from which such water is proposed to be~~  
22 ~~diverted. After determining the source of such relief water the Commission shall then~~  
23 ~~notify the Governor and he shall have the authority to declare a water emergency in an~~  
24 ~~area including said county, city or town and the source or sources of water available for~~  
25 ~~the relief hereinafter provided; provided, however, that no emergency period shall~~  
26 ~~exceed 30 days but the Governor may declare any number of successive emergencies~~  
27 ~~upon request of the Commission.~~

28 ~~(c) Water Emergency Powers and Duties of the Commission.— Whenever,~~  
29 ~~pursuant to this Article, the Governor has declared the existence of a water emergency~~  
30 ~~within a particular area of the State, the Commission shall have the following duties and~~  
31 ~~powers to be exercised only within said area and only during such time as the Governor~~  
32 ~~has, pursuant to this Article, designated as the period of emergency:~~

33 (1) ~~To authorize any county, city or town in which an emergency has been~~  
34 ~~declared to divert water in the emergency area sufficient to take care of~~  
35 ~~the needs of human consumption, necessary sanitation and public~~  
36 ~~safety. Provided, however, there shall be no diversion of waters from~~  
37 ~~any stream or body of water pursuant to this Article unless the person~~  
38 ~~controlling the water or sewerage system into which such waters are~~  
39 ~~diverted shall first have limited and restricted the use of water in such~~  
40 ~~water or sewerage system to human consumption, necessary sanitation~~  
41 ~~and public safety and shall have effectively enforced such restrictions.~~  
42 ~~Diversion of waters shall cease upon the termination of the water~~  
43 ~~emergency or upon the finding of the Commission that the person~~  
44 ~~controlling the water or sewerage system using diverted waters has~~

1           ~~failed to enforce effectively the restrictions on use to human~~  
2           ~~consumption and necessary sanitation and public safety. In the event~~  
3           ~~waters are diverted pursuant to this Article, there shall be no diversion~~  
4           ~~to the same person in any subsequent year unless the Commission~~  
5           ~~finds as fact from evidence presented that the person controlling the~~  
6           ~~water or sewerage system has made reasonable plans and acted with~~  
7           ~~due diligence pursuant thereto to eliminate future emergencies by~~  
8           ~~adequately enlarging such person's own water supply.~~

9           (2) ~~To make such reasonable rules and regulations governing the~~  
10           ~~conservation and use of diverted waters within the emergency area as~~  
11           ~~shall be necessary for the health and safety of the persons who reside~~  
12           ~~within the emergency area; and the violation of such rules and~~  
13           ~~regulations during the period of the emergency shall constitute a Class~~  
14           ~~1 misdemeanor; provided, however, that before such rules and~~  
15           ~~regulations shall become effective, they shall be published in not less~~  
16           ~~than two consecutive issues of not less than one newspaper generally~~  
17           ~~circulated in the emergency area.~~

18           (d) ~~Temporary Rights of Way. — When any diversion of waters is ordered by the~~  
19           ~~Commission pursuant to this Article, the person controlling the water or sewerage~~  
20           ~~system into which such waters are diverted is hereby empowered to lay necessary~~  
21           ~~temporary water lines for the period of such emergency across, under or above any and~~  
22           ~~all properties to connect the emergency water supply to an intake of said water or~~  
23           ~~sewerage system. The route of such water lines shall be prescribed by the Commission.~~

24           (e) ~~Compensation for Water Allocated during Water Emergency and Temporary~~  
25           ~~Rights of Way. — Whenever the Commission, pursuant to this Article has ordered any~~  
26           ~~diversion of waters, the person controlling the waters or sewerage system into which~~  
27           ~~such waters are diverted shall be liable to all persons suffering any loss or damage~~  
28           ~~caused by or resulting from the diversion of such waters or caused by or resulting from~~  
29           ~~the laying of temporary water lines to effectuate such diversion. The Commission,~~  
30           ~~before ordering such diversion, shall require that the person against whom liability~~  
31           ~~attaches hereunder to post bond with a surety approved by the Commission in an~~  
32           ~~amount determined by the Commission and conditioned upon the payment of such loss~~  
33           ~~or damage."~~

34           **SECTION 4.** Article 38 of Chapter 143 of the General Statutes is amended  
35 by adding a new section to read:

36           "**§ 143-354.1. Water conservation measures for severe, extreme, and exceptional**  
37           **drought.**

38           (a) **Minimum Water Conservation Measures.** – The Commission shall adopt rules  
39 **establishing minimum water conservation measures to be implemented by cities,**  
40 **counties, and unified local governments located in areas designated by the Drought**  
41 **Management Advisory Council as areas of severe, extreme, or exceptional drought. The**  
42 **rules shall prohibit the use of potable water for uses that can be supplied by reclaimed**  
43 **water, recycled wastewater, or treated gray water in areas that have been in exceptional**  
44 **drought for more than 60 days. Any restrictions on water use established by the rules**

1 shall not apply to use of reclaimed or recycled wastewater or to authorize use of treated  
2 or untreated gray water.

3 (b) Implementation of Minimum Water Conservation Measures. – Each city,  
4 county, or unified local government located in an area of severe, extreme, or exceptional  
5 drought as designated by the Drought Management Advisory Council shall implement  
6 the minimum water conservation measures established by rules adopted by the  
7 Commission pursuant to subsection (a) of this section. A city, county, or unified local  
8 government may adopt water conservation ordinances pursuant to their general police  
9 power. A local ordinance that imposes water conservation requirements shall be at least  
10 as stringent and may be more stringent than the minimum water conservation measures  
11 adopted by the Commission.

12 (c) Application of Minimum Water Conservation Measures. – A city, county, or  
13 unified local government is authorized to apply water conservation measures to all  
14 water users within its jurisdiction, including water users served by an investor-owned  
15 utility or private water supply well."

16 **SECTION 5.** G.S. 143-355 reads as rewritten:

17 **"§ 143-355. Powers and duties of the Department.**

18 (a) Repealed by Session Laws 1989, c. 603, s. 1.

19 (b) Functions to Be Performed. – The Department shall:

20 (1) Request the North Carolina Congressional Delegation to apply to the  
21 Congress of the United States whenever deemed necessary for  
22 appropriations for protecting and improving any harbor or waterway in  
23 the State and for accomplishing needed flood control, shore-erosion  
24 prevention, and water-resources development for water supply, water  
25 quality control, and other purposes.

26 (2) Initiate, plan, and execute a long-range program for the preservation,  
27 development and improvement of rivers, harbors, and inland ports, and  
28 to promote the public interest therein.

29 (3) Prepare and recommend to the Governor and the General Assembly  
30 any legislation which may be deemed proper for the preservation and  
31 improvement of rivers, harbors, dredging of small inlets, provision for  
32 safe harbor facilities, and public tidewaters of the State.

33 (4) Make engineering studies, hydraulic computations, hydrographic  
34 surveys, and reports regarding shore-erosion projects, dams, reservoirs,  
35 and river-channel improvements; to develop, for budget and planning  
36 purposes, estimates of the costs of proposed new projects; to prepare  
37 bidding documents, plans, and specifications for harbor, coastal, and  
38 river projects, and to inspect materials, workmanship, and practices of  
39 contractors to assure compliance with plans and specifications.

40 (5) Cooperate with the United States Army Corps of Engineers in causing  
41 to be removed any wrecked, sunken or abandoned vessel or  
42 unauthorized obstructions and encroachments in public harbors,  
43 channels, waterways, and tidewaters of the State.

- 1 (6) Cooperate with the United States Coast Guard in marking out and  
2 establishing harbor lines and in placing buoys and structures for  
3 marking navigable channels.
- 4 (7) Cooperate with federal and interstate agencies in planning and  
5 developing water-resource projects for navigation, flood control,  
6 hurricane protection, shore-erosion prevention, and other purposes.
- 7 (8) Provide professional advice to public and private agencies, and to  
8 citizens of the State, on matters relating to tidewater development,  
9 river works, and watershed development.
- 10 (9) Discuss with federal, State, and municipal officials and other interested  
11 persons a program of development of rivers, harbors, and related  
12 resources.
- 13 (10) Make investigations and render reports requested by the Governor and  
14 the General Assembly.
- 15 (11) Participate in activity of the National Rivers and Harbors Congress, the  
16 American Shore and Beach Preservation Association, the American  
17 Watershed Council, the American Water Works Association, the  
18 American Society of Civil Engineers, the Council of State  
19 Governments, the Conservation Foundation, and other national  
20 agencies concerned with conservation and development of water  
21 resources.
- 22 (12) Prepare and maintain climatological and water-resources records and  
23 files as a source of information easily accessible to the citizens of the  
24 State and to the public generally.
- 25 (13) Formulate and administer a program of dune rebuilding, hurricane  
26 protection, and shore-erosion prevention.
- 27 (14) Include in the biennial budget the cost of performing the additional  
28 functions indicated above.
- 29 (15) Initiate, plan, study, and execute a long-range floodplain management  
30 program for the promotion of health, safety, and welfare of the public.  
31 In carrying out the purposes of this subsection, the primary  
32 responsibility of floodplain management rests with the local levels of  
33 government and it is, therefore, the policy of this State and of this  
34 Department to provide guidance, coordination, and other means of  
35 assistance, along with the other agencies of this State and with the  
36 local levels of government, to effectuate adequate floodplain  
37 management programs.
- 38 (b1) The Department is directed to pursue an active educational program of  
39 floodplain management measures, to include in each biennial report a statement of flood  
40 damages, location where floodplain management is desirable, and suggested legislation,  
41 if deemed desirable, and within its capacities to provide advice and assistance to State  
42 agencies and local levels of government.
- 43 (c) Repealed by Session Laws 1961, c. 315.

1 (d) Investigation of Coasts, Ports and Waterways of State. – The Department is  
2 designated as the official State agency to investigate and cause investigations to be  
3 made of the coasts, ports and waterways of North Carolina and to cooperate with  
4 agencies of the federal and State government and other political subdivisions in making  
5 such investigations. The provisions of this section shall not be construed as in any way  
6 interfering with the powers and duties of the Utilities Commission, relating to the  
7 acquiring of rights-of-way for the Intra-Coastal Waterway; or to authorize the  
8 Department to represent the State in connection with such duties.

9 (e) Repealed by Session Laws 1998-129, s. 1, effective January 1, 2000.

10 (f) Samples of Cuttings to Be Furnished the Department When Requested. –  
11 Every person, firm or corporation engaged in the business of drilling, boring, coring or  
12 constructing wells in any manner by the use of power machinery shall furnish the  
13 Department samples of cuttings from such depths as the Department may require from  
14 all wells constructed by such person, firm or corporation, when such samples are  
15 requested by the Department. The Department shall bear the expense of delivering such  
16 samples. The Department shall, after an analysis of the samples submitted, furnish a  
17 copy of such analysis to the owner of the property on which the well was constructed;  
18 the Department shall not report the results of any such analysis to any other person  
19 whatsoever until the person legally authorized to do so authorizes in writing the release  
20 of the results of the analysis.

21 (g) Reports of Each Well Required. – Every person, firm or corporation engaged  
22 in the business of drilling, boring, coring, or constructing wells with power machinery  
23 within the State of North Carolina shall, within 30 days of the completion of each well,  
24 report to the Department on forms furnished by the Department the location, size, depth,  
25 number of feet of casing used, method of finishing, and formation log information of  
26 each such well. In addition such person, firm or corporation shall report any tests made  
27 of each such well including the method of testing, length of test, draw-down in feet and  
28 yield in gallons per minute. The person, firm or corporation making such report to the  
29 Department shall at the time such report is made also furnish a copy thereof to the  
30 owner of the property on which the well was constructed.

31 (h) Drilling for Petroleum and Minerals Excepted. – The provisions of this  
32 Article shall not apply to drillings for petroleum and minerals.

33 (i) Penalty for Violation. – Any person violating the provisions of subsections  
34 (e), (f) and (g) of G.S. 143-355 shall be guilty of a Class 3 misdemeanor and, upon  
35 conviction, shall only be punished by a fine of fifty dollars (\$50.00). Each violation  
36 shall constitute a separate offense.

37 (j) Miscellaneous Duties. – The Department shall make investigations of water  
38 supplies and water powers, prepare and maintain a general inventory of the water  
39 resources of the State and take such measures as it may consider necessary to promote  
40 their development; and to supervise, guide, and control the performance of the duties set  
41 forth in subsection (b) of this section and to hold hearings with regard thereto. In  
42 connection with administration of the well-drilling law the Department may prepare  
43 analyses of well cuttings for mineral and petroleum content.

1 (k) Water Use Information. – Any person using, withdrawing, diverting or  
2 obtaining water from surface streams, lakes and underground water sources shall, upon  
3 the request of the Department, file a monthly report with the Department showing the  
4 amount of water used, withdrawn, diverted or obtained from such sources. Such report  
5 shall be on a form supplied by the Department and shall show the identification of the  
6 water well or other withdrawal facility, location, withdrawal rate (measured in gallons  
7 per minute), and total gallons withdrawn during the month. Reports required to be filed  
8 under this subsection shall be filed on or before the fifteenth day of the month  
9 succeeding the month during which the using, withdrawing, diverting or obtaining water  
10 required to be reported occurred. This subsection does not apply to withdrawals or uses  
11 by individuals or families for household, livestock, or gardens. All reports required  
12 under this subsection are provided solely for the purpose of the Department. Within the  
13 meaning of this subsection the term "person" means any and all persons, including  
14 individuals, firms, partnerships, associations, public or private institutions,  
15 municipalities or political subdivisions, governmental agencies, and private or public  
16 corporations organized or existing under the laws of this State or any other state or  
17 country. In the event of drought or other water shortage, the Department may require  
18 each local government water system and each large community water system to report  
19 water use on a weekly basis and may require the reporting of additional information  
20 necessary to assess and manage the drought or water shortage.

21 (l) ~~For purposes of this subsection, "community water system" means a~~  
22 ~~community water system, as defined in G.S. 130A-313(10), that regularly serves 1,000~~  
23 ~~or more service connections or 3,000 or more individuals.~~ Local Water Supply Plans. –  
24 Each unit of local government that provides public water service or that plans to provide  
25 public water service and each large community water system shall, either individually  
26 or together with other units of local government and large community water systems,  
27 prepare a local water supply plan and submit it to the ~~Department.~~ Department for  
28 approval. The Department shall provide technical assistance with the preparation of  
29 plans to units of local government and large community water systems upon request and  
30 to the extent that the Department has resources available to provide assistance. At a  
31 minimum, each unit of local government and large community water system shall  
32 include in local water supply plans all information that is readily available to it. Plans  
33 shall include present and projected population, industrial development, and water use  
34 within the service area; present and future water supplies; an estimate of the technical  
35 assistance that may be needed at the local level to address projected water needs; current  
36 and future water conservation and water reuse programs; a description of how the local  
37 government or large community water system will respond to drought and other water  
38 shortage emergencies and continue to meet essential public water supply needs during  
39 the emergency; a water audit and leak detection program, identification of existing and  
40 planned interconnections to other water systems; and any other related information as  
41 the Department may require in the preparation of a State water supply plan. A unit of  
42 local government or large community water system shall submit a revised plan that  
43 specifies how the water system intends to address foreseeable future water needs when  
44 eighty percent (80%) of the water system's available water supply based on average

1 daily demand has been allocated to current or prospective water users or the seasonal  
2 demand exceeds ninety percent (90%). A unit of local government or large community  
3 water system shall submit a revised plan that reflects ~~Local plans shall be revised to~~  
4 reflect changes in relevant data and projections at least once each five years unless the  
5 Department requests more frequent revisions. The revised plan shall include the current  
6 and anticipated reliance by the local government unit or large community water system  
7 on surface water transfers as defined by G.S. 143-215.22G. Local plans and revised  
8 plans shall be submitted to the Department once they have been approved by each unit  
9 of local government and large community water system that participated in the  
10 preparation of the plan. The Department shall review each local water supply plan and  
11 shall approve a plan if the Department finds that the plan includes the information  
12 required under this subsection and the water supply sources identified in the plan can be  
13 used to supply potable water and are adequate to meet the water supply needs projected  
14 in the plan.

15 (m) In order to assure the availability of adequate supplies of good quality water  
16 to protect the public health and to support desirable economic growth, the Department  
17 shall develop a State water supply plan. The State water supply plan shall include the  
18 information and projections required to be included in local plans, a summary of water  
19 conservation and water reuse programs described in local plans, a summary of the  
20 technical assistance needs indicated by local plans, and shall indicate the extent to  
21 which the various local plans are compatible. The State plan shall identify potential  
22 conflicts among the various local plans and ways in which local water supply programs  
23 could be better coordinated.

24 (m1) The Secretary shall adopt all rules necessary to implement this section.

25 (n) The Department of Environment and Natural Resources shall report to the  
26 Environmental Review Commission on the implementation of this section and the  
27 development of the State water supply plan on or before 1 September of each year."

28 **SECTION 6.** Article 38 of Chapter 143 of the General Statutes is amended  
29 by adding a new section to read:

30 "**§ 143-355.2. Water shortage emergency powers.**

31 (a) Declaration of Water Shortage Emergency. – If the Secretary determines that  
32 the needs of human consumption, necessary sanitation, and public safety require  
33 emergency action, the Secretary shall notify the Governor. The Governor shall have the  
34 authority to declare a water shortage emergency in the area affected by the water  
35 shortage emergency. No emergency period shall exceed 30 days, but the Governor may  
36 declare successive emergencies upon recommendation of the Secretary.

37 (b) Water Shortage Emergency Powers and Duties. – Whenever, pursuant to this  
38 Article, the Governor declares the existence of a water shortage emergency within a  
39 particular area of the State, the Secretary shall have the powers and duties set out in  
40 subdivisions (1), (2), and (3) of this subsection. These powers may only be exercised  
41 within the designated water shortage emergency area, after the Secretary has consulted  
42 with the affected water systems and determined that the water shortage emergency  
43 cannot be effectively managed in the absence of exercising these powers, and only for

1 the period of the water shortage emergency. Under these circumstances, the Secretary  
2 has the power and duty to:

3 (1) Require any water system that has water supply in excess of that  
4 required to meet the essential water uses of its customers to provide  
5 water to a water system experiencing a water shortage emergency. The  
6 amount required to be supplied shall be limited to the amount  
7 necessary to supply essential water uses within the receiving system.  
8 The required diversion of waters shall cease upon the termination of  
9 the water shortage emergency.

10 (2) Adopt rules governing the conservation and use of water within the  
11 water shortage emergency area as shall be necessary for the health and  
12 safety of the persons who reside within the water shortage emergency  
13 area. Before such rules and regulations shall become effective, they  
14 shall be published in two consecutive issues of a newspaper generally  
15 circulated in the emergency area.

16 (3) Adopt rules governing conservation and use of water within the  
17 service area of the water system from which water is being diverted as  
18 shall be necessary to maintain essential water uses in the system while  
19 supplying water to the water shortage emergency area.

20 (c) Temporary Rights-of-Way. – When any diversion of waters is ordered by the  
21 Secretary pursuant to this Article, the receiving water or wastewater system is  
22 authorized to lay necessary temporary waterlines for the period of the water shortage  
23 emergency across, under, or above any and all properties to connect the emergency  
24 water supply to an intake of the supplying water or wastewater system without first  
25 acquiring right-of-way. The Department shall expedite the approval of temporary  
26 waterlines needed to provide emergency water supply under this section.

27 (d) Compensation for Water Allocated During Water Shortage Emergency and  
28 Temporary Rights-of-Way. – Whenever the Secretary, pursuant to this Article, has  
29 ordered any diversion of water, the receiving water or wastewater system shall  
30 reimburse the supplying water system for the cost of the water. The cost charge to the  
31 receiving system shall not exceed the retail cost that would be charged to a customer of  
32 the supplying system for an equivalent amount of water and any additional costs  
33 incurred by the supplying system for alterations to its infrastructure to effectuate the  
34 diversion. The receiving water system shall be liable to all persons suffering any loss or  
35 damage caused by or resulting from the laying of temporary waterlines to effectuate the  
36 diversion. The Secretary, before ordering a diversion, shall require the receiving water  
37 or wastewater system to post bond with a surety approved by the Secretary, in an  
38 amount determined by the Secretary, and conditioned upon the payment of any loss or  
39 damage."

40 **SECTION 7.** Article 38 of Chapter 143 of the General Statutes is amended  
41 by adding a new section to read:

42 "**§ 143-355.3. Water system efficiency.**

1       (a) For purposes of maintaining accurate records of water use, local government  
2 and large community water systems shall ensure that water delivered by the water  
3 system is metered to the maximum extent practicable.

4       (b) Local government water systems and large community water systems shall  
5 require separate meters for newly installed in-ground irrigation systems.

6       (c) To be eligible for State water infrastructure funds from the Drinking Water  
7 Revolving Fund or the Drinking Water Reserve Fund or any other grant or loan of funds  
8 allocated by the General Assembly whether the allocation of funds is to a State agency  
9 or to a nonprofit organization for the purpose of extending waterlines or expanding  
10 water treatment capacity, a local government or large community water system must  
11 demonstrate that the system:

12           (1) Has established a water rate structure that is adequate to pay the cost of  
13 maintaining, repairing, and operating the system, including reserves  
14 for payment of principal and interest on indebtedness incurred for  
15 maintenance or improvement of the water system during periods of  
16 normal use and periods of reduced water use due to implementation of  
17 water conservation measures. The funding agency shall apply  
18 guidelines developed by the State Water Infrastructure Commission in  
19 determining the adequacy of the water rate structure to support  
20 operation and maintenance of the system.

21           (2) Implemented a leak detection and repair program.

22           (3) Has an approved water supply plan pursuant to G.S. 143-355.

23       (d) No water system shall use a rate structure that gives residential water  
24 customers a lower per unit water rate as water use increases."

25       **SECTION 8.** Article 38 of Chapter 143 of the General Statutes is amended  
26 by adding a new section to read:

27 **"§ 143-355.4. Enforcement.**

28       (a) The Secretary may assess a civil penalty of not less than one hundred dollars  
29 (\$100.00) nor more than five hundred dollars (\$500.00) against any person who:

30           (1) Fails to report water use or other information required under  
31 G.S. 143-355(k);

32           (2) Fails to act in accordance with the terms, conditions, or requirements  
33 of an order issued by the Secretary under G.S. 143-355.2.

34           (3) Violates any provision of this Article or any rule adopted by the  
35 Commission, the Department, or the Secretary implementing this  
36 Article.

37       (b) For each willful action or failure to act for which a penalty may be assessed  
38 under this section, the Secretary may consider each day the action or inaction continues  
39 after notice is given of the violation as a separate violation. A separate penalty may be  
40 assessed for each separate violation.

41       (c) A civil penalty of not more than one thousand dollars (\$1,000) per month  
42 may be assessed against any city, county, or unified local government that fails to adopt  
43 a water conservation ordinance that meets the mandatory minimum standards for severe,  
44 extreme, and exceptional drought established by the Commission as required by

1 G.S. 143-354.1 or willfully fails to administer or enforce the provisions of its program  
2 in substantial compliance with the minimum water conservation standards.

3 (d) The violation of emergency water conservation rules adopted by the Secretary  
4 pursuant to G.S. 143-355.3(b) is a Class 1 misdemeanor.

5 (e) The Secretary shall notify any person assessed a civil penalty of the  
6 assessment and the specific reasons for the assessment by registered or certified mail, or  
7 by any means authorized by G.S. 1A-1, Rule 4. Contested case petitions shall be filed  
8 within 30 days of receipt of the notice of assessment."

9 **SECTION 9.** Article 10 of Chapter 143 of the General Statutes is amended  
10 by adding a new section to read:

11 **"§ 130A-329. Reporting.**

12 Reports required to be submitted under this Article or under rules adopted by the  
13 Commission shall be submitted electronically on a form specified by the Department.  
14 The Department may waive the requirement for electronic submission of a report if the  
15 water system demonstrates that it lacks the technical capability to report electronically."

16 **SECTION 10.** G.S. 130A-335(a) reads as rewritten:

17 "(a) A person owning or controlling a residence, place of business or a place of  
18 public assembly shall provide an approved wastewater system. All wastewater from  
19 water-using fixtures and appliances connected to a water supply source shall discharge  
20 to the approved wastewater system. A wastewater system may include components for  
21 collection, treatment and disposal of wastewater."

22 **SECTION 11.** Article 11 of Chapter 143 of the General Statutes is amended  
23 by adding a new section to read:

24 **"§ 130A-345. Untreated gray water; allowed uses.**

25 (a) For purposes of this section, "gray water" means wastewater removed from  
26 household wash basins, bathtubs, and showers.

27 (b) Notwithstanding G.S. 130A-335(a), untreated gray water may be used in  
28 periods of drought to hand water trees, shrubs, and inedible plants under the following  
29 conditions:

30 (1) Gray water shall be applied as soon as practicable. Untreated gray  
31 water should not be stored for later use.

32 (2) Gray water containing hazardous chemicals including, but not limited  
33 to, residue from solvents, shall not be used.

34 (3) Use of untreated gray water is restricted to the residential property  
35 where the gray water originates. Untreated gray water shall not be  
36 allowed to run off onto adjoining property, roadways, or into drainage  
37 features such as ditches and storm drains.

38 (4) Untreated gray water shall be applied using buckets, watering cans, or  
39 other handheld containers. Gray water may not be used in an irrigation  
40 system unless the gray water has been treated in accordance with  
41 standards set out in the State Plumbing Code.

42 (5) Gray water shall not be applied closer than 100 feet to surface waters  
43 or a water supply well."

44 **SECTION 12.** G.S. 159G-23 reads as rewritten:

1    **"§ 159G-23. Common criteria for loan or grant from Wastewater Reserve or**  
2    **Drinking Water Reserve.**

3       The criteria in this section apply to a loan or grant from the Wastewater Reserve or  
4    the Drinking Water Reserve. The Division of Water Quality and the Division of  
5    Environmental Health must each establish a system of assigning points to applications  
6    based on the following criteria:

- 7           (1) Public necessity. – An applicant must explain how the project  
8           promotes public health and protects the environment. A project that  
9           improves a system that is not in compliance with permit requirements  
10          or is under orders from the Department, enables a moratorium to be  
11          lifted, or replaces failing septic tanks with a wastewater collection  
12          system has priority.
- 13          (2) Effect on impaired waters. – A project that improves designated  
14          impaired waters of the State has priority.
- 15          (3) Efficiency. – A project that achieves efficiencies in meeting the State's  
16          water infrastructure needs or reduces vulnerability to drought by one  
17          of the following methods has priority:
- 18           a. The combination of two or more wastewater or public water  
19           systems into a regional wastewater or public water system by  
20           merger, consolidation, or another means.
- 21           b. Conservation or reuse of water-water, including bulk water  
22           reuse facilities and waterlines to supply reuse water for  
23           irrigation and other approved uses.
- 24           c. Construction of an interconnection between water systems  
25           intended for use in drought or other water shortage emergency.
- 26           d. Repair or replacement of leaking waterlines.
- 27           e. Replacement of meters and installation of new metering  
28           systems.
- 29          (4) Comprehensive land-use plan. – A project that is located in a city or  
30          county that has adopted or has taken significant steps to adopt a  
31          comprehensive land-use plan under Article 18 of Chapter 153A of the  
32          General Statutes or Article 19 of Chapter 160A of the General Statutes  
33          has priority over a project located in a city or county that has not  
34          adopted a plan or has not taken steps to do so. The existence of a plan  
35          has more priority than steps taken to adopt a plan, such as adoption of  
36          a zoning ordinance. A plan that exceeds the minimum State standards  
37          for protection of water resources has more priority than one that does  
38          not. A project is considered to be located in a city or county if it is  
39          located in whole or in part in that unit. A land-use plan is not  
40          considered a comprehensive land-use plan unless it has provisions that  
41          protect existing water uses and ensure compliance with water quality  
42          standards and classifications in all waters of the State affected by the  
43          plan.

- 1 (5) Flood hazard ordinance. – A project that is located in a city or county  
2 that has adopted a flood hazard prevention ordinance under  
3 G.S. 143-215.54A has priority over a project located in a city or  
4 county that has not adopted an ordinance. A plan that exceeds the  
5 minimum standards under G.S. 143-215.54A for a flood hazard  
6 prevention ordinance has more priority than one that does not. A  
7 project is considered to be located in a city or county if it is located in  
8 whole or in part in that unit. If no part of the service area of a project is  
9 located within the 100-year floodplain, the project has the same  
10 priority under this subdivision as if it were located in a city or county  
11 that has adopted a flood hazard prevention ordinance. The most recent  
12 maps prepared pursuant to the National Flood Insurance Program or  
13 approved by the Department determine whether an area is within the  
14 100-year floodplain.
- 15 (6) Sound management. – A project submitted by a local government unit  
16 that has demonstrated a willingness and ability to meet its  
17 responsibilities through sound fiscal policies and efficient operation  
18 and management has priority.
- 19 (7) Capital improvement plan. – A project that implements the applicant's  
20 capital improvement plan for the wastewater system or public water  
21 system it manages has priority over a project that does not implement a  
22 capital improvement plan. To receive priority, a capital improvement  
23 plan must set out the applicant's expected water infrastructure needs  
24 for at least 10 years.
- 25 (8) Coastal habitat protection. – A project that implements a  
26 recommendation of a Coastal Habitat Protection Plan adopted by the  
27 Environmental Management Commission, the Coastal Resources  
28 Commission, and the Marine Fisheries Commission pursuant to  
29 G.S. 143B-279.8 has priority over other projects that affect counties  
30 subject to that Plan."

31 **SECTION 13.** The State Water Infrastructure Commission, in consultation  
32 with the Department of Environment and Natural Resources and the School of  
33 Government at the University of North Carolina at Chapel Hill, shall develop guidelines  
34 for water rate structures that are adequate to pay the cost of maintaining, repairing, and  
35 operating the system, including payment of principal and interest on indebtedness  
36 incurred for maintenance or improvement of the water system. The guidelines shall also  
37 consider the effect of water rates on water conservation and recommend rate structures  
38 that support water conservation. Copies of the guidelines shall be made available to the  
39 Department of Environment and Natural Resources, the North Carolina Utilities  
40 Commission, and to all local government water systems and large community water  
41 systems, as defined in G.S. 143-350. The Commission shall report to the Environmental  
42 Review Commission on its progress in developing the guidelines no later than January  
43 1, 2009.

1           **SECTION 14.** The Department of Environment and Natural Resources shall  
2 develop recommendations for water efficiency standards for water-using fixtures in  
3 residential and commercial building and in-ground irrigation systems. The Department  
4 shall also develop recommendations for efficient metering of water use by local  
5 government and large community water systems. The Department shall submit its  
6 recommendations to the Commissioner of Insurance, the Chair of the Building Code  
7 Council, and the Environmental Review Commission no later than January 1, 2009.

8           **SECTION 15.** Section 5 of this act becomes effective when the act becomes  
9 law and applies to local water supply plans due after that date. Sections 1, 3, 6, and 9 of  
10 this act become effective October 1, 2008. Section 8 of this act becomes effective  
11 December 1, 2008, and applies to offenses committed on or after that date. Section 7 of  
12 this act is effective July 1, 2009. All other sections of this act become effective when  
13 this act becomes law.
