4 "ARTICLE XII. WATER AND SEWER

5 "Sec. 12.1. Alternative Methods of Assessment. In addition to, and as alternatives, to the
6 method provided in G.S. 160-241 for assessing the costs of water and sewer lines and laterals,
7 the Board of Commissioners, if in its opinion it would be more equitable to do so, is hereby
8 authorized in its discretion to levy any such assessments according to either of the following
9 methods: (1) equally against each of the lots capable of being served by such line or lines, or
10 (2) on the basis of the footage of land upon a public street by an equal rate per foot of such
11 frontage.

12 In lieu of assessing the total cost of a particular project as herein provided, the governing
13 body may annually, between the first days of January and July of each year, determine the
14 average cost of installing water and sewer mains or lines and on the basis of such determination
15 may make assessments of such average cost during the following fiscal year beginning July 1.
16 The average cost of such installation shall include the cost of the particular size and material of
17 lines completed during the preceding calendar year. It may also include the anticipated increase
18 in labor and materials costs based upon the average of such increases during the preceding five
19 calendar years. The assessment of the average cost of such line shall not be made until after the
20 particular assessment project has been completed. The purpose of this Section is to distribute
21 more equitably the cost of the installation of water and sewer lines throughout the Town; to
22 permit a property owner to know in advance what the cost of installation of water and sewer
23 lines benefiting his or her property will be; and to permit the most expeditious assessment of
24 cost against property after completion of the installation of such lines. The actual cost of
25 acquisition of rights-of-way may also be assessed as a part of the cost of an individual project.
26 If the right-of-way costs have not been determined and assessed with the assessment of the
27 average installation costs at the time of the completion of the project, such costs may be
28 assessed separately when they are determined.

37 law.
